

Series:
HSZ
Discharge Bore:
50·80mm
Motor Output / Pole:
0.4·0.75kW / 2-pole

The HSZ-series is a submersible single-phase automatic portable drainage pump. The automatic operation, controlled by a single float switch, reduces power consumption and extends operating life. Though the pump is a single-phase unit, it has the durability equivalent to three-phase drainage pumps, since the wear parts are made of abrasion-resistant materials. The side discharge, spiral design allows smoother passage of the sucked solid matters. The shaft-mounted agitator prevents the air lock that tends to take place on vortex or semi-vortex pumps.
