

Series: KTVE	Discharge Bore: 50·80(100)mm	Motor Output / Pole: 0.75 - 5.5kW / 2-pole
-------------------------------	---	---

The KTVE-series is a submersible three-phase automatic portable drainage pump. An innovative electrode type relay unit built into the pump automatically starts and stops the pump to eliminate dry-running. This mechanism greatly reduces power consumption and extends operating life. The pump body is made of die-casted aluminium alloy, which is extremely advantageous in terms of portability. The sleeves that protect the pump casing, oil casing and water passages are made of synthetic rubber as a consideration against wear. The top discharge, side flow design assures efficient motor cooling even when it operates with its motor exposed to air. The slim design allows the pump to be placed in a confined space.

Selection Table

Model	Discharge Bore mm	Motor Output kW	Phase	Starting Method	Pole	Dry Weight kg
KTVE2.75	50	0.75	3-phase	Direct on Line	2	13.3
KTVE21.5	50(80)	1.5	3-phase	Direct on Line	2	22
KTVE22.2	50(80)	2.2	3-phase	Direct on Line	2	25
KTVE33.7	80(100)	3.7	3-phase	Direct on Line	2	40
KTVE35.5	80(100)	5.5	3-phase	Direct on Line	2	52

● Discharge bore in parentheses available on special request.

Performance Curves

Electrode Probe Cover (Optional Accessory)

The electrode probe for the water level sensor is a critical component for the automatic operation of the pump. Pumps are occasionally subjected to strong impacts during installation or when moving from place to place in harsh sites such as construction and mining.

Therefore, Tsurumi has prepared a probe cover made of structural steel to protect the electrode probe from strong impacts. This component can be easily installed in the field.

SPECIFICATIONS	Model	KTVE21.5	KTVE-series
			1.5kW, 3-phase

Type of Pump

Submersible automatic drainage pump for construction and foundation works, floodwater drainage, etc.

Automatic Control Device

Electrode

Die-casted Aluminium Alloy Body & Wear-resistant Synthetic Rubber

Provide a great advantage in terms of portability. The pump body is made of die-casted aluminium alloy. The sleeves that protect the pump casing, oil casing and water passages are made of synthetic rubber, thus eliminating worries about durability and wear.

Type of Fluid

Stormwater, groundwater, wash water, and sand-carrying water

Temperature: 0 to 40°C

Discharge Bore & Connection

50mm, Hose Coupling
(80mm discharge bore available on special request)

Motor Output

1.5kW

Power Supply

Three-phase

Starting Method

Direct on Line

Motor

Continuous-duty rated, dry-type induction motor

Insulation Class: E

Degree of Protection: IP68

No. of Poles & Speed (Synchronous Speed)

2-pole, 3000/3600min⁻¹ (50/60Hz)

Power Supply Voltages & Rated Currents

50Hz	60Hz
380V – 3.4A	220V – 5.6A
400V – 3.3A	380V – 3.3A
415V – 3.2A	440V – 2.8A

Power Cable

Sheath: PVC

Standard Length: 8m

200 to 600V supply:

1 x 4 x 1.25mm², O.D. 11.1mm

Dry Weight (excluding cable)

22kg

Impeller

Vortex impeller deigned for “high-gap structure”, made of ductile cast iron

Solids Passage

50Hz – ϕ 8.5mm

60Hz – ϕ 8.5mm

Protection Plate

Made of 304 stainless steel, protect the oil casing made of aluminium alloy die casting from abrasive particles.

Cable Entry with Anti-Wicking Block

Watertight cable entry with strain-relief device. The anti-wicking block prevents water incursion due to capillary action should the power cable be damaged or the end submerged.

Bearing

Permanently lubricated, deep-groove, double-shielded C3 ball bearings

Shaft

403 stainless steel

Shaft Seal (Mechanical Seal)

Furnished with a double-face mechanical seal located in oil chamber. Both upper and lower seal faces always run in a clean environment.

Upper Seal Face: SiC + SiC

Lower Seal Face: SiC + SiC

V-Ring

Used as a “Dust Seal”, it protects the mechanical seal from abrasive particles.

OIL LIFTER

Equipped in oil chamber. It forcibly supplies lubricating oil to the mechanical seal and continues to supply the oil to the upper seal faces even if lubricant falls below the rated volume.

Type of Lubricating Oil & Volume

Turbine Oil (ISO VG32), 270ml

Motor Protection Device

A circle thermal protector built in the motor housing. Directly cuts the motor circuit if excessive heat builds up or an overcurrent condition occurs in the motor.

Optional Accessories

Male Threaded Coupling

Extension Probe

Electrode Probe Cover
