

**Series:**
**HS**
**Discharge Bore:**
**50·80mm**
**Motor Output / Pole:**
**0.4·0.75kW / 2-pole**

The HS-series is a submersible single-phase portable drainage pump. Though it is a single-phase unit, the pump has the durability equivalent to three-phase drainage pumps, since the wear parts are made of abrasion-resistant materials. The side discharge, spiral design allows smoother passage of the sucked solid matters. The shaft-mounted agitator prevents the air lock that tends to take place on vortex or semi-vortex pumps.

**Selection Table**
